Easy Entrance

The comprehensive solution for paid access

For strongly frequented establishments the sanitary facilities constitute a huge expense factor. Those guests, who do not consume anything, incur costs while they do not contribute to turnover. This situation demands an innovative management, which not only covers the costs incurred, but at the same time generates additional turnover: Easy Entrance is a modular system that offers the necessary components for simple paid access and at the same time gives you the opportunity of electronic control and analysis. And this goes as far as multi-site networking of all system components and respective analysis of incoming data.

Easy Entrance facilitates a redemption system for access fees. Consuming guests may use the facilities free of charge. They receive a voucher, which may be redeemed at the POS. The additional turnover thus generated and the contributions of those guests who do not consume anything make the investment pay off after very short time.

Easy Entrance: Value Access

Safe, secure, convenient and profitable
Easy Entrance combines all components for paid access: from on-site hardware as far as the necessary software for networking, flow of information and analysis. The modular, holistic and transparent solution is suitable for single-site use as well as for central administration of multiple sites.

THE COMPONENTS AT A GLANCE

Pay machine with tripod turnstile
The combination for payment, access and voucher issue. It helps securing that even those guests, who do not consume anything, do contribute to your cost recovery. Easy-to-use, appealing design.

Kids door
A manual swing door for free access of children and wheelchair users. Serves also for goods transport and as additional escape route.

Exit turnstile
Secures facilities against unpaid access. Rotates freely in exit direction for easy leaving of the facilities.

Ticket validator
Serves for voucher redemption at the cash point. It registers the number of vouchers redeemed and helps prevent the multiple use of single vouchers.

Managing software
For online control of the units. Real-time access via remote software or cloud service and analysis via POS system and accounting.

Integrated paid access

Everything under control
How many guests did use the facilities? How many vouchers have been redeemed? Depending on the level, the system records all activities centrally and up to date. The data may be used for many processes, for instance accounting, personnel planning or materials management.

How it works

1 Payment. Each guest pays the defined amount at the pay machine.

2 Issue of voucher. The guest takes the voucher and the change if so.

3 Admission. The access is now clear. It is free of charge for children via the kids door.

4 Leaving the facility. The turnstile is unlocked in exit direction.

Easy Entrance custom-made

	Station	Remote	Open Remote	Connect	Open Connect
Pay machine	•	•	•	•	•
Local manual ticket validation	•	•	•	•	•
Analysis on printout	•	•	•	•	•

Ticket validation via web service					•
Interface for point-of-sales data					•
Online configuration of prices and ticket logos				•	•

5 Redeeming the voucher.
Presenting the voucher when paying the bill, the guest gets a refund.

6 Comprehensive overview.
The management software provides transparent data for comparison of visitor frequencies, thus facilitating personnel planning and more.

Example 1

Shopping mall / no voucher system

Facility users		Earnings from user fee (€ 0,50 / person)
Daily	700	350,00 €
Monthly	21.000	10.500,00 €
Yearly	255.500	127.750,00 €

Sectors and examples of use

Roadhouses **Petrol stations** **Shopping malls** **Restaurant chains** **Leisure parks**

Example 2

Frequented petrol station or roadhouse / participation in voucher system

Facility users		50% of the facility users do not consume anything. Earnings from user fee (€ 0,50 / person)	50% of the facility users redeem the voucher. (Average turnover per voucher € 0,75 to € 1,10)	Total earnings with Easy Entrance system
Daily	500	€ 125,00	€ 187,50 - 275,00	€ 312,50 - 400,00
Monthly	15.000	€ 3.750,00	€ 5.625,00 - 8.250,00	€ 9.375,00 - 12.000,00
Yearly	182.500	€ 45.625,00	€ 68.437,50 - 100.375,00	€ 114.062,50 - 146.000,00
